

Way of Working - Group 23, task 2

The team has achieved all of the checklist items for the Seeded state. The team is defined in terms of size, members and all of the constraints such as other courses have been identified. Also the goals and responsibilities are clear for the team. The team does not have a specific leadership structure, everyone is involved in the decisions.

When the work is divided, every team member is responsible for its task as described in the second state. The team has met and started working. Also each member has committed to working on the project. Communication is done through selected channels and is used properly. What's stopping the team from moving on to the "collaborating" state is "The team members understand their responsibilities and how they align with their competencies". Since the project is quite new and it has been difficult to completely align every team member's strengths with responsibilities.
